Instructions for EZ-2-GO Prep

1. Please refer to General Bowel Prep Instructions for diet recommendations
2. On the day prior to the colonoscopy, mix 119g (7 capfuls) of PEG 3350 into 32 ounces of clear liquid (i.e. Gatorade, etc). Repeat x1 to create two 32 ounce prep solutions.
3. One day prior to the colonoscopy, at 4pm, take 4 Bisacodyl tablets (20mg total).
4. One day prior to the colonoscopy, at 7pm, drink 32 ounces of prep solution over 1 hour, followed by another 32 ounces of clear liquid over the next hour.
5. Take Simethicone tablet before bedtime
6. Six hours before the procedure, drink 32 ounces of prep solution over 1 hour, followed by another 32 ounces of clear liquid over the next hour.
7. Stop drinking prep 4 hours prior to procedure time
